

**Tokyo won the right to host the Olympics in 2020 !
Your joy is our sorrow.**

There are no words to express how much we were shocked by this crazy situation. I can't forget the terrible presentation Prime Minister Abe gave in which he exploited Fukushima children affected by the nuclear disaster to win sympathy from all over the world.

In the presentation children in Fukushima are happily playing soccer under clear blue skies.

Please really give them a chance to make their dreams come true.

Whether or not you know much about the nuclear disaster, we are deeply concerned that the campaign for the Tokyo Olympics ignores the welfare of our children and is at the expense of their future.

To Mr. Abe and those who only think about the games in Tokyo, your joy is our sorrow.

We ask you to face your responsibilities for the mistakes you made.

You are to blame for the activities containing many issues in Fukushima.

Understand that our children remain victims while you are celebrating and their problems go unresolved.

Even though our voice is small, we will never stop speaking up from Fukushima.

Please consider seriously the future of our children affected by the nuclear disaster.

We need everyone to pull together to save our kids now.

Let's shout out together, "Let's right a wrong!"

Happiness that comes at the expense of another is an illusion.

And your glory is nothing but a delusion.

How can you be happy and celebrate the Olympics if you sacrifice others?
